

// BOOKS UNIT

# APEX BOOKS PRO

// Your bookkeeper, automated.

Apex Books Pro links to QuickBooks and categorizes every transaction the moment it lands, writing it back to your books in seconds. It only asks you when it truly cannot call it.

## TALK TO IT LIKE THIS

"What is uncategorized?"	"Reconcile this week"	"Show this month's P&L"	"Why this category?"
"Remember that rule"	"Flag anything over \$1k"		

## WHAT IT HANDLES

- + Live QuickBooks sync
- + Categorizes in seconds
- + Flags only what it is unsure of
- + Logged and reversible, audit-safe

## INPUT → OUTCOME

YOU PUT IN
HOME DEPOT #4512 -\$284.19
YOU GET BACK
<b>Categorized: Job Materials, tagged to the active job.</b> <b>Written to QuickBooks.</b> (A vague vendor instead posts: "Flagged, needs your call.")

## THE ROI

<p><b>30+ hrs</b></p> <p>BACK EVERY MONTH</p>	<p><b>Seconds</b></p> <p>PER TRANSACTION</p>	<p><b>0</b></p> <p>MONTH-END SCRAMBLE</p>
---	--	---

No bookkeeper backlog, no catch-up fees, always audit-ready. Clean books without the hourly bill.
